OCTOBER 5, 2013

Interview with Eng. Jorge Spitalnik, President-Elect of WFEO

Jorge Spitalnik is the President-Elect of WFEO. He has worked for many years in Brazil and he belongs to Federation of Brazilian Engineering Association.

E-Newsletter: *Sir, what can you tell us about engineering in Brazil, in South America and in the world?*

Eng. Jorge: In Brazil, the engineering profession is having a very great recognition. The government has realized the importance of engineering due to the commitment the engineers have taken in the following years in public works in covering the work gap. Also for the Olympics, they realized there was going to be a shortage of man power in engineering construction and engineering infrastructures. In Americas, there is a good appeal for engineering people. In fact this is a renewal of the recognition of the profession; it was not like this in recent years. I think this is due to the expansion of the economy of the South America and America as a whole. For the world, we have different situations for the

President-Elect, WFEO

world. We are aiming at WFEO to show the civil society the importance of the engineering profession because all what is done in improvement of quality life of mankind, all what is done in terms of management of his environment starts with the work of the engineers. Civilization of a nation is based on what people are doing and thinking about the citizens of their countries and how to improve their way of life.

E-Newsletter: *For the new generation of engineering, what do you think is their future and challenges?*

Eng. Jorge: The challenges of the new generation, engineering is not an easy career. It is a challenge in terms of the basic sciences and the basic mathematics and the basic elements that they need to dominate in other to practice. Mainly, the challenge is for the young engineers to take care and to understand very profoundly how he is doing things to improve the well being of his country. Once he gets that, then he will be a very good element for the society. Thank you.

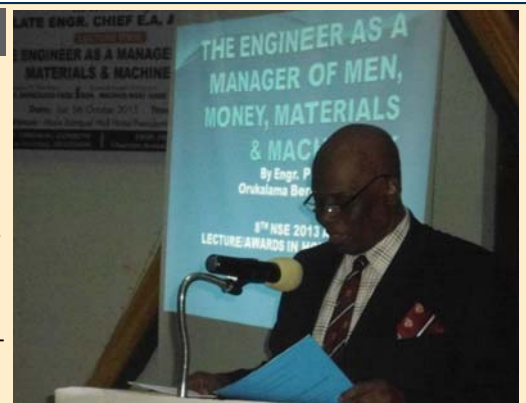

E-Newsletter: *Thank you sir.*
